EDUCATION

Uttaranchal University, Dehradun, Uttarakhand
Bachelor of Technology — Computer Science and Engineering

2025
Grade: 8.80/10

EXPERIENCE

Full Stack Developer Intern | Corover.ai

Jun '25 – Present

- Assisting in the development of AI-powered chatbot solutions using Node.js and React
- - Writing clean, reusable code and participating in agile development sprints

Full Stack developer Intern | Zidio Development

Jul '24 – Aug '24

- Collaborated on the development of a full-stack Job Listing portal that streamlined the application process for students and equipped recruiters with efficient tools to post job openings and manage candidate profiles.
- Acquired practical experience in modern web development technologies, contributing to both the frontend (React.js, CSS) for a smooth user experience and the backend (Node.js, MongoDB) for robust data handling and API integration.
- Leveraged version control (Git/GitHub) for collaborative coding, managing pull requests, and maintaining a clean codebase.
- Conducted code reviews and knowledge-sharing sessions, promoting continuous learning and team improvement.

PROJECTS

Job Listing Portal

- Coordinated with a cross-functional team to develop a full-stack job listing portal, enabling students to register, log in, and apply for jobs, while providing recruiters with tools to post job listings and manage company profiles.
- Directed the design and front-end development using React.js, creating a responsive, user-friendly interface that increased user engagement by 20%.
- Enhanced performance by optimizing API integration and state management (React Router, Redux), ensuring smooth navigation and reducing load times by 25%.
- GitHub: https://github.com/hardik10-debug/Job_portal

Music Platform

- Led the development of a music streaming platform utilizing open-source music APIs, providing seamless access to a wide variety of tracks and playlists.
- Implemented secure user authentication via OAuth 2.0, ensuring data protection and personalized user experiences.
- Optimized API calls and caching mechanisms, resulting in a 25% improvement in load times and smooth playback functionality across devices.
